CONTENTS OF VOLUME 50

NUMBER 1, SEPTEMBER, 1966

1 E. C. Foulkes. The action of pitressin on solute permeability of the rabbit nephron in vivo

9 J. Gordin Kaplan and Wanda Tacreiter. The β-glucosidase of the yeast cell surface

25 Maxwell Mark Mozell. The spatiotemporal analysis of odorants at the level of the olfactory receptor sheet

43 Raimundo Villegas, Gloria M. Villegas, Margarita Blei, Francisco C. Herrera, and Jorge Villegas. Nonelectrolyte penetration and sodium fluxes through the axolemma of resting and stimulated medium sized axons of the squid *Doryteuthis plei*

61 L. J. Beilin, G. J. Knight, A. D. Munro-Faure, and J. Anderson. The measurement of sodium concentration in human red blood cells

75 L. J. Beilin, D. Eyeions, G. Hatcher, G. J. Knight, A. D. Munro-Faure, and J. Anderson. The entry of sodium into human red blood cells in vivo

89 R. J. Lipicky and S. H. Bryant. Sodium, potassium, and chloride fluxes in intercostal muscle from normal goats and goats with hereditary myotonia

113 T. Z. Csáky and P. M. Ho. The effect of potassium on the intestinal transport of glucose

129 Carlo Caputo. Caffeine- and potassium-induced contractures of frog striated muscle fibers in hypertonic solutions

141 Michael V. L. Bennett and Harry Grundfest. Analysis of depolarizing and hyperpolarizing inactivation responses in gymnotid electroplaques

171 Paul L. LaCelle and Aser Rothstein. The passive permeability of the red blood cell to cations

189 J. Tille. Electrotonic interaction between muscle fibers in the rabbit ventricle

203 Yukiharu Inui and Halvor N. Christensen. Discrimination of single transport systems. The Na^+-sensitive transport of neutral amino acids in the Ehrlich cell

225 P. C. Jackson and D. G. Edwards. Cation effects on chloride fluxes and accumulation levels in barley roots

NUMBER 2, NOVEMBER, 1966

243 Tomio Kanno and Kojiro Matsuda. The effects of external sodium and potassium concentration on the membrane potential of atrioventricular fibers of the toad

255 B. A. Curtis. Ca fluxes in single twitch muscle fibers

269 R. A. Sjodin. Long duration responses in squid giant axons injected with ^{134}cesium sulfate solutions

LIBRARY
ALMA COLLEGE
ALMA, MICHIGAN

279 WILLIAM J. ADELMAN, JR., and JOSEPH P. SENFT. Voltage clamp studies on the effect of internal cesium ion on sodium and potassium currents in the squid giant axon

295 DUNCAN W. MARTIN and JARED M. DIAMOND. Energetics of coupled active transport of sodium and chloride

317 G. H. TAKAHASHI, I. FATT, and T. K. GOLDSTICK. Oxygen consumption rate of tissue measured by a micropolarographic method

337 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. I. NaCl

351 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. II. Temperature

359 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. III. The alkali halides

369 JOHN H. NORTHROP. Increased mutation rate of *E. coli* K12λ cultures maintained in continuous logarithmic growth

379 PING LEE, ANNA WOO, and DANIEL C. TOSTESON. Cytodifferentiation and membrane transport properties in LK sheep red cells

391 R. MOTAIS, F. GARCIA ROMEU, and J. MAETZ. Exchange diffusion effect and euryhalinity in teleosts

423 ALAN R. FREEMAN, JOHN P. REUBEN, PHILIP W. BRANDT, and HARRY GRUNDFEST. Osmometrically determined characteristics of the cell membrane of squid and lobster giant axons

447 WOLF-D. DETTBARN and PHILIP ROSENBERG. Effect of ions on the efflux of acetylcholine from peripheral nerve

461 M. TAKATA, W. F. PICKARD, J. Y. LETTVIN, and JOHN W. MOORE. Ionic conductance changes in lobster axon membrane when lanthanum is substituted for calcium

473 S. F. TAKAGI, G. A. WYSE, and TOSHI YAJIMA. Anion permeability of the olfactory receptive membrane

491 CLAY M. ARMSTRONG. Time course of TEA^+-induced anomalous rectification in squid giant axons

NUMBER 3, JANUARY, 1967

505 ISSEI SEYAMA and HIROSHI IRISAWA. The effect of high sodium concentration on the action potential of the skate heart

519 GEORG VON BÉKÉSY. Mach band type lateral inhibition in different sense organs

533 R. A. SJODIN and L. J. MULLINS. Tracer and nontracer potassium fluxes in squid giant axons and the effects of changes in external potassium concentration and membrane potential

551 JOHN O. HOLLOSZY and H. T. NARAHARA. Enhanced permeability to sugar associated with muscle contraction. Studies of the role of Ca^{++}

563 GEORG H. SCHMID and HANS GAFFRON. Light metabolism and chloroplast structure in chlorophyll-deficient tobacco mutants

583 SUSUMU HAGIWARA and KUNITARO TAKAHASHI. Surface density of calcium ions and calcium spikes in the barnacle muscle fiber membrane

603 J. DEL CASTILLO and T. MORALES. The electrical and mechanical activity of the esophageal cell of *Ascaris lumbricoides*

631 J. DEL CASTILLO and T. MORALES. Extracellular action potentials recorded from the interior of the giant esophageal cell of *Ascaris*

647 BEATRICE M. SWEENEY, CHARLES F. TUFFLI, JR., and RICHARD H. RUBIN. The circadian rhythm in photosynthesis in *Acetabularia* in the presence of actinomycin D, puromycin, and chloramphenicol

661 EDMUND H. SONNENBLICK. Active state in heart muscle. Its delayed onset and modification by inotropic agents

677 GILBERT N. LING and MARSHA H. KROMASH. The extracellular space of voluntary muscle tissues

695 T. W. CLARKSON. The transport of salt and water across isolated rat ileum. Evidence for at least two distinct pathways

729 T. HOSHIKO and BARRY D. LINDLEY. Phenomenological description of active transport of salt and water

759 DEFOREST MELLON, JR. Analysis of compound postsynaptic potentials in the central nervous system of the surf clam

NUMBER 4, MARCH, 1967

781 GENE A. MORRILL and ELLIOTT ROBBINS. The role of calcium in the regulation of the steady-state levels of sodium and potassium in the HeLa cell

793 MABEL R. HOKIN and LOWELL E. HOKIN. The formation and continuous turnover of a fraction of phosphatidic acid on stimulation of NaCl secretion by acetylcholine in the salt gland

813 AKIRA WATANABE, SHOSAKU OBARA, TOYOHIRO AKIYAMA, and KATSUTO YUMOTO. Electrical properties of the pacemaker neurons in the heart ganglion of a stomatopod, *Squilla oratoria*

839 AKIRA WATANABE, SHOSAKU OBARA, and TOYOHIRO AKIYAMA. Pacemaker potentials for the periodic burst discharge in the heart ganglion of a stomatopod, *Squilla oratoria*

863 HRVOJE LORKOVIĆ. The effect of pH on the mechanical activity of the frog toe muscle

883 HRVOJE LORKOVIĆ. The influence of ionic strength on potassium contractures and calcium movements in frog muscle

893 JOHN C. PARKER and JOSEPH F. HOFFMAN. The role of membrane phosphoglycerate kinase in the control of glycolytic rate by active cation transport in human red blood cells

917 CHAN JUNG and ASER ROTHSTEIN. Cation metabolism in relation to cell size in synchronously grown tissue culture cell

933 T. J. FRANZ and J. T. VAN BRUGGEN. Hyperosmolarity and the net transport of nonelectrolytes in frog skin

951 PETER E. POOL and EDMUND H. SONNENBLICK. The mechanochemistry of cardiac muscle. I. The isometric contraction

967 W. MCD. ARMSTRONG and ASER ROTHSTEIN. Discrimination between alkali metal cations by yeast. II. Cation interactions in transport

989 ICHIJI TASAKI, IRWIN SINGER, and AKIRA WATANABE. Cation interdiffusion in squid giant axons

279 WILLIAM J. ADELMAN, JR., and JOSEPH P. SENFT. Voltage clamp studies on the effect of internal cesium ion on sodium and potassium currents in the squid giant axon

295 DUNCAN W. MARTIN and JARED M. DIAMOND. Energetics of coupled active transport of sodium and chloride

317 G. H. TAKAHASHI, I. FATT, and T. K. GOLDSTICK. Oxygen consumption rate of tissue measured by a micropolarographic method

337 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. I. NaCl

351 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. II. Temperature

359 HOWARD L. GILLARY. Stimulation of the salt receptor of the blowfly. III. The alkali halides

369 JOHN H. NORTHROP. Increased mutation rate of *E. coli* K12λ cultures maintained in continuous logarithmic growth

379 PING LEE, ANNA WOO, and DANIEL C. TOSTESON. Cytodifferentiation and membrane transport properties in LK sheep red cells

391 R. MOTAIS, F. GARCIA ROMEU, and J. MAETZ. Exchange diffusion effect and euryhalinity in teleosts

423 ALAN R. FREEMAN, JOHN P. REUBEN, PHILIP W. BRANDT, and HARRY GRUNDFEST. Osmometrically determined characteristics of the cell membrane of squid and lobster giant axons

447 WOLF-D. DETTBARN and PHILIP ROSENBERG. Effect of ions on the efflux of acetylcholine from peripheral nerve

461 M. TAKATA, W. F. PICKARD, J. Y. LETTVIN, and JOHN W. MOORE. Ionic conductance changes in lobster axon membrane when lanthanum is substituted for calcium

473 S. F. TAKAGI, G. A. WYSE, and TOSHI YAJIMA. Anion permeability of the olfactory receptive membrane

491 CLAY M. ARMSTRONG. Time course of TEA^+-induced anomalous rectification in squid giant axons

NUMBER 3, JANUARY, 1967

505 ISSEI SEYAMA and HIROSHI IRISAWA. The effect of high sodium concentration on the action potential of the skate heart

519 GEORG VON BÉKÉSY. Mach band type lateral inhibition in different sense organs

533 R. A. SJODIN and L. J. MULLINS. Tracer and nontracer potassium fluxes in squid giant axons and the effects of changes in external potassium concentration and membrane potential

551 JOHN O. HOLLOSZY and H. T. NARAHARA. Enhanced permeability to sugar associated with muscle contraction. Studies of the role of Ca^{++}

563 GEORG H. SCHMID and HANS GAFFRON. Light metabolism and chloroplast structure in chlorophyll-deficient tobacco mutants

583 SUSUMU HAGIWARA and KUNITARO TAKAHASHI. Surface density of calcium ions and calcium spikes in the barnacle muscle fiber membrane

603 J. DEL CASTILLO and T. MORALES. The electrical and mechanical activity of the esophageal cell of *Ascaris lumbricoides*

631 J. DEL CASTILLO and T. MORALES. Extracellular action potentials recorded from the interior of the giant esophageal cell of *Ascaris*

647 BEATRICE M. SWEENEY, CHARLES F. TUFFLI, JR., and RICHARD H. RUBIN. The circadian rhythm in photosynthesis in *Acetabularia* in the presence of actinomycin D, puromycin, and chloramphenicol

661 EDMUND H. SONNENBLICK. Active state in heart muscle. Its delayed onset and modification by inotropic agents

677 GILBERT N. LING and MARSHA H. KROMASH. The extracellular space of voluntary muscle tissues

695 T. W. CLARKSON. The transport of salt and water across isolated rat ileum. Evidence for at least two distinct pathways

989 ICHIJI TASAKI, IRWIN SINGER, and AKIRA WATANABE. Cation interdiffusion in squid giant axons

1009 FRANS F. JÖBSIS and JAMES C. DUFFIELD. Oxidative and glycolytic recovery metabolism in muscle. Fluorometric observations on their relative contributions

1049 KIMIHISA TAKEDA. Permeability changes associated with the action potential in procaine-treated crayfish abdominal muscle fibers

1075 LETTERS TO THE EDITOR

GERALD S. WASSERMAN. Density spectrum of *Limulus* screening pigment

1079 ABSTRACTS OF PAPERS PRESENTED AT THE TWENTY-FIRST ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS

NUMBER 5, MAY, 1967

1101 L. L. COSTANTIN and R. J. PODOLSKY. Depolarization of the internal membrane system in the activation of frog skeletal muscle

1125 YORIMI MATSUMOTO. Validity of the force-velocity relation for muscle contraction in the length region, $l \leq l_0$

1139 YORIMI MATSUMOTO. Theoretical series elastic element length in *Rana pipiens* sartorius muscles

1157 LEON HURWITZ, STANLEY VON HAGEN, and PAUL D. JOINER. Acetylcholine and calcium on membrane permeability and contraction of intestinal smooth muscle

1173 ALAN K. RIDER, HAROLD P. SCHEDL, GEORGE NOKES, and STREETER SHINING. Small intestinal glucose transport. Proximal-distal kinetic gradients

1183 DANTE J. CHIARANDINI and ENRIQUE STEFANI. Two different ionic mechanisms generating the spike "positive" afterpotential in molluscan neurons

1201 R. L. POST, C. D. ALBRIGHT, and K. DAYANI. Resolution of pump and leak components of sodium and potassium ion transport in human erythrocytes

1221 G. A. LANGER. Sodium exchange in dog ventricular muscle. Relation to frequency of contraction and its possible role in the control of myocardial contractility

1241 STANLEY G. SCHULTZ, PETER F. CURRAN, RONALD A. CHEZ, and ROBERT E. FUISZ. Alanine and sodium fluxes across mucosal border of rabbit ileum

1261 PETER F. CURRAN, STANLEY G. SCHULTZ, RONALD A. CHEZ, and ROBERT E. FUISZ. Kinetic relations of the Na–amino acid interaction at the mucosal border of intestine

1287 BERTIL HILLE. The selective inhibition of delayed potassium currents in nerve by tetraethylammonium ion

1303 YUTAKA NAITOH and IKUO YASUMASU. Binding of Ca ions by *Paramecium caudatum*

1311 JOHN S. COOK. Nonsolvent water in human erythrocytes

1327 ARSELIO P. CARVALHO and BARBARA LEO. Effects of ATP on the interaction of Ca^{++}, Mg^{++}, and K^+ with fragmented sarcoplasmic reticulum isolated from rabbit skeletal muscle

1353 FREEMAN W. COPE. NMR evidence for complexing of Na^+ in muscle, kidney, and brain, and by actomyosin. The relation of cellular complexing of Na^+ to water structure and to transport kinetics

1377 R. I. Sha'afi, G. T. Rich, Victor W. Sidel, William Bossert, and A. K. Solomon. The effect of the unstirred layer on human red cell water permeability

1401 John W. Moore, Mordecai P. Blaustein, Nels C. Anderson, and Toshio Narahashi. Basis of tetrodotoxin's selectivity in blockage of squid axons

1413 Toshio Narahashi, Nels C. Anderson, and John W. Moore. Comparison of tetrodotoxin and procaine in internally perfused squid giant axons

1429 Roger Eckert and George T. Reynolds. The subcellular origin of bioluminescence in *Noctiluca miliaris*

1459 Emil Bozler. Determination of extracellular space in amphibian muscle

NUMBER 6, PART 1, JULY, 1967

1469 David O. Carpenter. Temperature effects on pacemaker generation, membrane potential, and critical firing threshold in *Aplysia* neurons

1485 David Holtzman. The effect of low ionic strength extracellular solutions on the resting potential in skeletal muscle fibers

1499 Harold Lecar, Gerald Ehrenstein, Leonard Binstock, and Robert E. Taylor. Removal of potassium negative resistance in perfused squid giant axons

1517 Elizabeth W. Stephenson. Cation regulation in the smooth muscle of frog stomach

1547 Carl J. Bentzel and A. K. Solomon. Osmotic properties of mitochondria

1565 Nick Sperelakis, Martin F. Schneider, and E. J. Harris. Decreased K^+ conductance produced by Ba^{++} in frog sartorius fibers

1585 Robert N. Frank and Timothy H. Goldsmith. Effects of cardiac glycosides on electrical activity in the isolated retina of the frog

1607 J. A. Raven. Ion transport in *Hydrodictyon africanum*

1627 J. A. Raven. Light stimulation of active transport in *Hydrodictyon africanum*

1641 Paul L. Weiden, Wolfgang Epstein, and Stanley G. Schultz. Cation transport in *Escherichia coli*. VII. Potassium requirement for phosphate uptake

1663 Robert J. Hay and John Paul. Factors influencing glucose flux and the effect of insulin in cultured human cells

1681 W. H. Biggley, J. E. Lloyd, and H. H. Seliger. The spectral distribution of firefly light. II

1693 Wallace O. Fenn, Marcia Henning, and Mary Philpott. Oxygen poisoning in *Drosophila*

1709 Donald A. Fischman and Roy C. Swan. Nickel substitution for calcium in excitation-contraction coupling of skeletal muscle

1729 Thomas E. Andreoli, J. Andrew Bangham, and Daniel C. Tosteson. The formation and properties of thin lipid membranes from HK and LK sheep red cell lipids

1751 R. I. Sha'afi and W. R. Lieb. Cation movements in the high sodium erythrocyte of the cat

1765 ALBERT CASS and ALAN FINKELSTEIN. Water permeability of thin lipid membranes
1785 ROBERT S. EISENBERG. The equivalent circuit of single crab muscle fibers as determined by impedance measurements with intracellular electrodes
1807 GILBERT N. LING, MARGARET M. OCHSENFELD, and GEORGE KARREMAN. Is the cell membrane a universal rate-limiting barrier to the movement of water between the living cell and its surrounding medium?

NUMBER 6, PART 2, JULY, 1967

FOREWORD ALFRED P. FISHMAN
GENERAL INTRODUCTION ALFRED STRACHER
LIST OF PARTICIPANTS

Contractile Processes in Macromolecules

3 ALFRED STRACHER. Introduction
5 HAROLD A. SCHERAGA. Contractility and conformation
29 L. MANDELKERN. Some fundamental molecular mechanisms of contractility in fibrous macromolecules

Contractile Processes in Striated Muscle

63 S. V. PERRY. Introduction
71 H. E. HUXLEY. Recent X-ray diffraction and electron microscope studies of striated muscle
85 PAUL DREIZEN, LEWIS C. GERSHMAN, PAUL P. TROTTA, and ALFRED STRACHER. Myosin. Subunits and their interactions
119 TERU HAYASHI. Reactivities of actin as a contractile protein

Comparative Aspects of Muscular Contraction

137 ALEXANDER SANDOW. Introduction
139 J. W. S. PRINGLE. Evidence from insect fibrillar muscle about the elementary contractile process
157 BETTY M. TWAROG. The regulation of catch in molluscan muscle
171 G. F. ELLIOTT. Variations of the contractile apparatus in smooth and striated muscles. X-ray diffraction studies at rest and in contraction
185 ARNOLD M. KATZ. Regulation of cardiac muscle contractility
197 MICHAEL BÁRÁNY. ATPase activity of myosin correlated with speed of muscle shortening

Contractile Processes in Nonmuscular Systems

221 DANIEL MAZIA. Introduction
223 LIONEL I. REBHUN. Structural aspects of saltatory particle movement
241 PETER SATIR. Morphological aspects of ciliary motility
259 SHINYA INOUÉ and HIDEMI SATO. Cell motility by labile association of molecules. The nature of mitotic spindle fibers and their role in chromosome movement

NUMBER 7, AUGUST, 1967

1821 JOHN GUTKNECHT. Ion fluxes and short-circuit current in internally perfused cells of *Valonia ventricosa*

1835 JOSEPH P. SENFT. Effects of some inhibitors on the temperature-dependent component of resting potential in lobster axon

1849 E. CARAFOLI. In vivo effect of uncoupling agents on the incorporation of calcium and strontium into mitochondria and other subcellular fractions of rat liver

1865 W. R. LOEWENSTEIN, M. NAKAS, and S. J. SOCOLAR. Junctional membrane uncoupling: Permeability transformations at a cell membrane junction

1893 K. L. ZANKEL, PATRICIA V. BURKE, and M. DELBRÜCK. Absorption and screening in *Phycomyces*

1907 ALAN R. KOLBER and PAUL G. LEFEVRE. Evidence for carrier-mediated transport of monosaccharides in the Ehrlich ascites tumor cell

1929 ALFRED STRICKHOLM and B. GUNNAR WALLIN. Relative ion permeabilities in the crayfish giant axon determined from rapid external ion changes

1955 LETTERS TO THE EDITOR

HARRY GRUNDFEST. The anomalous spikes of *Ascaris* esophageal cells

NUMBER 8, SEPTEMBER, 1967

1961 ROBERT D. DEVOE. Nonlinear transient responses from light-adapted wolf spider eyes to changes in background illumination

1993 ROBERT D. DEVOE. A nonlinear model for transient responses from light-adapted wolf spider eyes

2031 JOHN MCD. TORMEY and JARED M. DIAMOND. The ultrastructural route of fluid transport in rabbit gall bladder

2061 JARED M. DIAMOND and WILLIAM H. BOSSERT. Standing-gradient osmotic flow. A mechanism for coupling of water and solute transport in epithelia

2085 ROGER F. PALMER and VIRGINIA A. POSEY. Ion effects on calcium accumulation by cardiac sarcoplasmic reticulum

2097 MAHLON E. KRIEBEL. Conduction velocity and intracellular action potentials of the tunicate heart

2109 ALLEN ISAACSON and ALEXANDER SANDOW. Quinine and caffeine effects on ^{45}Ca movements in frog sartorius muscle

NUMBER 9, OCTOBER, 1967

2131 GEORG H. SCHMID and HANS GAFFRON. Quantum requirement for photosynthesis in chlorophyll-deficient plants with unusual lamellar structures

2145 HARUO SUGI and RIKUO OCHI. The mode of transverse spread of contraction initiated by local activation in single crayfish muscle fibers

2167 HARUO SUGI and RIKUO OCHI. The mode of transverse spread of contraction initiated by local activation in single frog muscle fibers

2177 CARLO CAPUTO and MAXIMO GIMENEZ. Effects of external calcium deprivation on single muscle fibers

2197 MABEL R. HOKIN. The Na^+, K^+, and Cl^- content of goose salt gland slices and the effects of acetylcholine and ouabain

2211 ROGER ECKERT. The wave form of luminescence emitted by *Noctiluca*

2239 ALAN S. BAHLER, JOHN T. FALES, and KENNETH L. ZIERLER. The active state of mammalian skeletal muscle

2255 A. C. FORADORI, ALBERT BERTINCHAMPS, JANE M. GULIBON, and GEORGE C. COTZIAS. The discrimination between magnesium and manganese by serum proteins

2267 ROBERT M. CHAPMAN and ABNER B. LALL. Electroretinogram characteristics and the spectral mechanisms of the median ocellus and the lateral eye in *Limulus polyphemus*

2289 G. PILAR. Further study of the electrical and mechanical responses of slow fibers in cat extraocular muscles

NUMBER 10, NOVEMBER, 1967

2303 F. J. BRINLEY, JR., and L. J. MULLINS. Sodium extrusion by internally dialyzed squid axons

2333 L. J. MULLINS and F. J. BRINLEY, JR. Some factors influencing sodium extrusion by internally dialyzed squid axons

2357 RONALD A. CHEZ, RICHARD R. PALMER, STANLEY G. SCHULTZ, and PETER F. CURRAN. Effect of inhibitors on alanine transport in isolated rabbit ileum

2377 H. BURR STEINBACH. On the ability of isolated frog skin to manufacture Ringer's fluid

2391 G. T. RICH, R. I. SHA'AFI, T. C. BARTON, and A. K. SOLOMON. Permeability studies on red cell membranes of dog, cat, and beef

2407 F. C. HUNEEUS and H. L. FERNANDEZ. Effect of specific antibodies on the excitability of internally perfused squid axons

2421 HARVEY M. LEVY and ELIZABETH M. RYAN. The contractile and control sites of natural actomyosin

2437 W. H. FREYGANG, JR., S. I. RAPOPORT, and L. D. PEACHEY. Some relations between changes in the linear electrical properties of striated muscle fibers and changes in ultrastructure

2459 M. R. BENNETT. The effect of intracellular current pulses in smooth muscle cells of the guinea pig vas deferens at rest and during transmission

2477 ABSTRACTS OF PAPERS PRESENTED AT THE TWENTY-SECOND ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS

NUMBER 11, DECEMBER, 1967
